Main Features

- There were 51,333 work injuries resulting in an absence from work of one shift or more in 1984-85. This compares with 51,352 injuries in 1983-84. Although there was no significant change in the total number of work injuries in 1984-85, there was a 25 per cent decrease to 4,491 in the number of injuries reported in the manufacture of meat products industry. The number of work injuries in other industries increased by 3 per cent to 46,842 in 1984-85.
- The number of work injuries resulting in fatalities increased from 32 in 1983-84 to 55 in 1984-85. This increase occurred mainly in the road transport industry (3 in 1983-84 to 12 in 1984-85), wholesale and retail industries (3 in 1983-84 to 8 in 1984-85), and the entertainment and recreation service industries (nil in 1983-84 to 4 in 1984-85). The number of work injuries resulting in permanent disability increased by 15 per cent from 684 in 1983-84 to

785 in 1984-85. The average duration of temporary disability for work injuries in 1984-85 (25.7 days for males and 32.0 days for females) remained much the same as in 1983-84 (25.4 days for males and 31.5 days for females).

Occupational diseases decreased by 7 per cent from 2,239 in 1983-84 to 2,076 in 1984-85. This decrease was due to a significant drop in diseases occurring in the manufacture of meat products industry (from 562 in 1983-84 to 334 in 1984-85). Diseases of the musculoskeletal system and connective tissue (including tenosynovitis and tendonitis) increased by 13 per cent from 764 in 1983-84 to 862 in 1984-85.

In 1984-85 the wholesale and retail trade industries accounted for the most work injuries of any industry group (13 per cent of all work injuries). The construction industry accounted for 11 per cent of all work injuries.

Explanatory NotesIntroduction

Statistics of industrial accidents shown in this publication for 1984-85 were derived from reports of compensative accidents occurring during that period.

They are compiled from information made available to the ABS by the Workers' Compensation Board of Queensland and the Queensland Police Department.

(priced)

Scope of the Statistics

In Queensland, workers' compensation insurance is confined solely to the Workers' Compensation Board of Queensland which commenced operations on 1 July 1978. Prior to this date, workers' compensation insurance was the responsibility of the State Government Insurance Office (S.G.I.O.). By policies issued under the "Workers' Compensation Act 1916-1984", employers

Explanatory Notes (continued)Scope of the Statistics (continued)

indemnify themselves against all sums for which, in respect of injuries to workers employed, they may become legally liable by way of compensation or damages in relation to that injury. Claims made on the Workers' Compensation Board of Queensland are the main source of information on compensative industrial accidents.

Self-employed persons are not obliged to insure, hence a number of workers in primary industry and in the professions etc. are not recorded. Also members of the Australian Government Service, including Australia Post and Telecom Australia, are excluded by the provisions of the Act, and coverage is thereby restricted in the administrative and communications industries. Members of the Police Force, although excluded under the Act, are collected separately and are included in the tables.

The scope of the collection is limited to include only those injured employees who lost at least a full shift from work as a result of an accident. Accidents occurring during recess periods or on journeys to or from work are not classified as industrial accidents, but some details of such accidents are presented in Table 17. In addition, details of persons who were compensated for a disease arising out of work or the working environment appear in Tables 15, 16, and 17. Cases of occupational disease precipitated or aggravated by some accidental event are classified to the antecedent work injury rather than to the disease.

Definitions

An industrial accident is defined as any compensated work injury or a compensated occupational disease causing death, permanent disability, or absence of the injured person from work during the entire interval corresponding to the hours of his or her regular shift on any one or more calendar days subsequent to the date of the injury.

Fatal injuries or diseases have been included in the tabulations on the condition that they were accepted by the Workers' Compensation Board of Queensland on or before 31 December 1985.

Permanent disability is an injury or disease which does not cause death but results in the complete loss or loss of use of any member or any part of a member of the body, or any permanent impairment of functions of the body or part thereof. All permanent disabilities have been tabulated unless rejected for workers' compensation.

Temporary disability is an injury or disease which does not result in death or permanent impairment but renders the injured person unable to perform a regularly established job during the entire time interval

corresponding to the hours of a full regular shift. Temporary disabilities are only included in the tabulations if compensation commences within six months of the accident.

Duration of temporary disability refers to the number of calendar days lost rather than to the actual number of working days lost.

Type of accident is the event which directly resulted in the injury, i.e. the manner in which contact was made between the injured person and the object or substance causing the injury.

Agency related to the accident is the agency, i.e. working environment, production equipment, animal, etc., which, because of its hazardous nature or condition, precipitated the event designated as the accident.

Industry classification is according to the Australian Standard Industrial Classification, 1983 Edition.

Occupation classification is according to the Classified List of Occupations, Revised November 1980.

Bodily location of injury refers to the part of the body injured. In cases where there is a major and minor injury resulting from the accident, only the major location is coded. Multiple locations are only coded when there is a major injury to more than one location.

Occupational diseases are classified to the three digit categories of the Ninth (1975) Revision of the World Health Organisation's International Classification of Diseases.

Unpublished Statistics

The ABS can also make available certain industrial accidents statistics which are not published. Where it is not practicable to provide the required statistics by telephone, they may be available in other forms, such as microfiche, photocopy, computer printout, or clerically extracted tabulation. A charge may be made for providing unpublished statistics in these forms.

For further information on these unpublished statistics, contact Noel Mallory by telephoning Brisbane (07) 222 6044, or write to Information Services at the address above.

Symbols and Other Usages

n.e.c. Not elsewhere classified.

- Nil or less than half the final digit shown.
